

Concentrate PROTEKTOR 20l

Product code:

SP130-02-120

Product description

Concentrate SPARTUS® PROTEKTOR is preparation dedicated to internal parts of gas nozzles, tools and metal surfaces. It prevents the adherence and melting into the surface of splinters during MIG/MAG welding, laser welding, brazing and bonding. Thanks to it's application additional treatment is not required. The preparations do not contain any silicone. Product is a non-flammable and contain a corrosion inhibitor. The preparations contain degreasing components that dissolve oils and fats on the protected items. It mostly reduces the need to degrease the surface before further works (for example before painting or galvanizing).

Concentrate should be diluted 1 to 4 with tap water (1 part of concentrate and 4 parts of water). We get 5l of liquid ready to use from 1l of concentrate.
