

MasterTIG torch 125F / head TIG 9 / 4m / 1F / X / SK35 control plug

Product code:

SPM125FA-4-SW1F-X-1BEZ

Product description

The TIG SPARTUS® 125F torch is an innovative solution that allows the use of 3 different types of heads:

torch head SP 9 [small parts] options: *SP9-P*; *SP9-90*; *SP9-70*

torch head SP 24[small parts/without back cap] options: *SP24-90*; *SP24-70*

torch head SP 17 [large parts] options: *SP1726*; *SP1726P*

Thanks to the replaceable torch head, the conversion of the torch takes about the same as replacing consumable parts.

The TIG torch 125F is of the FLEX type, which increases the usability of the system. Welding complex structures is much easier. For particularly hard-to-reach places, we recommend the *SP100L* (100mm) and *SP150L* (150mm) extensions also of the FLEX type. They will allow for a significant extension of the burner.

You can choose the following TIG torch:

125FA with torch head *SP9-70* [125A DC]

125FB with torch head *SP1726* [150A DC]

125FC with torch head *SP24-70* [125A DC]

CONTROL PLUG

With an extra cost, SPARTUS® welding torches can be also equipped with control plug to the most leading makes of welding machines.

Technical parameters

Rating	125A DC 100A AC
Electrode diameter [mm]	0.5, 1.0, 1.6, 2.0, 2.4
Gas flow rate [L/min]	7 - 15
Duty cycle [%]	60
Series	Master
Cooling	gas
Torch body	125F [replacement heads]
Head type	9-70 [small parts]
Torch body	flex
Length [m]	4
Handle	round
Microswitch	convex
Package	textile-rubber + 1m leather cable cover after grip
Connections	SK35
