

PAINT SPRAY GUN NOZZLE H.V.L.P. - 1.4MM

Product code:

SP703-20-014

Product description

SPARTUS® Pneumatics paint spray gun H.V.L.P

SPARTUS® Pneumatics H.V.L.P. (High Volume Low Pressure) paint spray guns are characterised by high performance and simple use. Their design is more complex from that of HP spray guns.

The paint spray guns, designed in H.V.L.P. technology, allow to significantly reduce the demand for input pressure, down to 2.5 bar. The design of the guns reduces material loss by as much as 30% vs. conventional guns, what significantly decreases the costs of their use. One should, however, remember that SPARTUS® Pneumatics H.V.L.P. paint spray guns require a more effective compressor to achieve their rated performance. Taking into account the high quality of their manufacture, the ergonomics of their design and their high performance level, SPARTUS® Pneumatics H.V.L.P. paint spray guns will be proper both in professional use and in hobby applications. SPARTUS® Pneumatics H.V.L.P. paint spray guns can be used for any painting task, using water-based and solvent-based paints, as well as woodstains.

Technical parameters

Type of nozzle	H.V.L.P.
Operating pressure [bar]	3
Nozzle ø [mm]	1.4
Air consumption [l/min]	170 - 312
Capacity of cup [ml]	600
Air inlet	1/4"

PRODUCT CATEGORIES: [PNEUMATICS](#), [VARNISHING](#)
