

Wireless foot control

Product code:

SP-FC2

Product description

Wireless foot control for TIG welding devices enables remote current control during welding. The value of the current depends on the pressure of the operator's foot. It is a perfect solution for precise TIG welding at a stationary welding station. The use of wireless communication minimizes the number of control wires.

Maximum range of wireless solutions 100m – depends on the conditions prevailing in the environment. In rooms with irregular shapes and/or with a strong density of equipment, the range may change and be smaller than the maximum value specified.
