

SPARTUS® EasyARC 205LCD
 PRECISION AND LIGHT INVERTER
 WITH LCD DISPLAY

TECHNICAL PARAMETERS

Input [V]	Welding current [A]	Duty cycle MMA [%]	No-load voltage [V]	Current consumption [A]	Weight [kg]	Dimensions [mm]
230	MMA 10 - 200 TIG LIFT 10 - 200	60	80	50	4	270 × 130 × 200

Additional features: HOT START, ARC FORCE, VRD

DESCRIPTION

SPARTUS® EasyARC 205LCD is small, light inverter welder. It allows the MMA and TIG Lift DC welding in the 10 – 200A range at high 60% work cycle.

Functions:

- Hot Start – facilitates striking the arc
- Arc Force – prevents the electrode from “sticking” to the welded material
- VRD - voltage reduction system

LCD DISPLAY

The modern LCD allows an easy and intuitive setting the welding current strength, simultaneously presenting recommended electrode diameter and material thickness for the set current.

SPARTUS® EasyARC 205LCD

PACKAGE EQUIPMENT:

- electrode holder
- work clamp
- shield
- hammer with a brush
- shoulder strap
- user's manual
